402 DUNSMUIR

ABOUT THIS PROJECT

- + Nine-storey, mixed-use office building located in downtown Vancouver.
- + Features floor-to-ceiling glass, modern amenity and retail spaces, convenient parking, and easy access to public transportation.
- + Designed to support the city’s growing technology presence.
- + Attractive office space for global tech firms, such as Amazon (the building’s anchor tenant).
- + Gross floor area of the “retail pod” (located at the corner of West Georgia and the adjacent service laneway) is 17,000 square feet.
- + Engaged as the mechanical, electrical, communications, and intelligent integrated systems consultant for this project.
- + Achieved LEED Core and Shell Gold certification.
- + Leveraged industry-leading technology solutions to design an integrated building platform that suits the unique needs of this mixed-use office building.
- + Secure, integrated building platform improved operational effectiveness, energy efficiency, and user experiences.
- + A suite of smart capable systems prepared the building to leverage the latest technology platforms well into the future.
