Mechanical, Electrical

# SCANDINAVE SPA

## ABOUT THIS PROJECT

- + Consists of two living units for eight staff, a sauna, a steam room, three different types of relaxing rooms / solariums, exterior terraces, and green roofs.
- + Provided mechanical and electrical expertise to create the owner's vision of a traditional, relaxing, and peaceful Scandinavian spa facility.
- + Created an ultimate calm and tranquil indoor and outdoor environment for the guests.
- + The key engineering feat was finding solutions to balance the high humidity environment (due to the hydrotherapy experience provided at the Spa) with Whistler's sub-zero winter conditions.
