MARRIOTT HOTEL - CALGARY INTERNATIONAL AIRPORT

ABOUT THIS PROJECT

- + Within the Calgary International Airport and includes 318 suites on seven levels, as well as four podium levels-mezzanine, departures, arrivals, and utilities.
- + Features a pool, gym, banquet room, commercial kitchen with modern appliances, and assorted meeting rooms.
- + The stairwell (a focal point) features a custom made organic sculpture lit from within using several LED lamps to add sparkle to the hanging crystal drops.
- + Hidden linear LED luminaries located within the underside of the stairs creates translucent glowing panels.
- + Custom-made reception desks are backlit with LED luminaires, and both wall washers and downlights to provide ambient lighting.
- + Main ballroom equipped with custom made cloud panels that are surrounded by LED coves, and features intelligent controls to provide multiple requirements.
- + Large exposed perimeter glass in public areas have numerous hot water radiant panels as a source of supplemental heat.
- + To control the fan coil operation and maintain energy efficiency, each fan coil (one within each suite) is tied to a thermostat, which is connected to the building management system (BMS).
