PARK HYATT X HOUSE

ABOUT THIS PROJECT

- + Event and residential space located in one of Beijing's tallest residential towers.
- + Residential lighting approach accommodates architectural features such as domed walls and ceilings, spa bathrooms and a 1000-bottle wine cellar.
- + Dimming, programmed flicker and colour changing lighting effects used to simulate movement and different weather conditions.
- + Fibre optic LED pin luminaire in the main gathering space create a "stars in the night sky" feature ceiling.
- + Separate lighting controls in each room feature completely dimmable luminaire fixtures and vacancy sensors.
- + Custom LED lighting systems designed to highlight specific features within individual spaces.
- + The network of domes connecting the rooms are accentuated by LED lighting tape at the base of walls, naturally guiding occupants from one room to another.
- + Occupancy sensor-operated LED lights in winery create ideal environment for the long-term storage of vintage wine bottles.
