YORK UNIVERSITY - OSGOODE HALL PROFESSIONAL DEVELOPMENT CENTRE

ABOUT THIS PROJECT

- + Audio-visual upgrades for York University's Osgoode School of Business Professional Development Centre.
- + Includes a 100 seat, 52 seat, and 40 seat classrooms, two smaller classrooms, and a lounge / event space across an entire floor of Osgoode Hall.
- + 100 seat classroom hall includes space to host a panel with multiple participants.
- + Collaborated with the Osgoode AV team to design an audio-visual platform that allows instructors to present to both local and virtual students with full-production capabilities for streaming and video capture.
- + Instructors can leverage high-quality web streaming capabilities in each classroom (with an operator option for the three larger classrooms).
- + Designed an audio-visual platform that enhanced the existing options with present-day technology, allowing the Osgoode Hall technical team to leverage their existing knowledge when operating the new system.
