

HALIFAX FERRY TERMINAL UPGRADES

ABOUT THIS PROJECT

- + Involved full-scale upgrades to each of the city's three ferry terminals: Alderney, Woodside, and the Halifax Ferry Terminal.
- + Renovation included a planned roll-out of a modernized transit fare system.
- + Provided mechanical and electrical services for the ferry terminal retrofit, which included new tourism kiosks, new tenant spaces, service room improvements, and the renovation of washroom facilities.
- + Designed the sanitary component of the washroom renovations, which presented a challenge as the sanitary component would reside below sea water level.
- + Additional upgrades were made to the security desk kiosk.
- + Installed a new ceiling acoustic panel system (designed to dampen unwanted noise) in passenger waiting areas.

LOCATION
Halifax, NS

**SMITH + ANDERSEN
SERVICES PROVIDED**
Mechanical, Electrical

SIZE
15,000 sq. ft. (1394 sq. m.)
