WILFRID LAURIER UNIVERSITY FACULTY OF MUSIC RENOVATION AND ADDITION

ABOUT THIS PROJECT

- + This project has a double storey open glass concept with a sunken performance pit.
- + The performance pit and ramp has in ground heating and unique decorative lighting in the ground floor in this area.
- + Along the curved wall where there's wood panelling, there are curved linear diffusers above to match the curvature.
- + Smith and Andersen also specified wireless lighting control system to allow different scenes and programming features for the lighting system.
- + The area around the existing theater has a cove light to highlight the existing curved wall.
- + All light fixtures specified in this project are efficient LED fixtures.
- + The new additional second floor practice rooms also have in floor heating as well.
